

Builders Process for Stand-Alone Electrical Services

- 1) Builder emails request for new electrical services
 - Service Writer emails builder form or it can be downloaded online
 - Form must be completed and emailed to myrequest@stradaelectric.com
- 2) Pre-Site visit requirements
 - Electric utilities in ground or transformer locations staked
 - For pond aerators: Must be set or cabling staked at edge of pond
- 3) White flagged, locates called in by Strada
- 4) Service Writer emails proposal to be reviewed & signed.
 - Estimated turnaround time to receive proposal after receiving builder form is 3-5 business days
- 5) Apply for permit (permitting form, signed contract, riser/plans if needed)
 - Estimated permit turnaround time is 5-10 business days
- 6) NOC if it's over 2500 (we need the ORIGINAL copy returned to us via FedEx); Inspections will not be scheduled until original copy is received, and we can record the document.
- 7) When permit is issued it will be emailed to service team and builder to begin scheduling process
- 8) Release all materials, address labels and available fault current labels required after permit is issued
 - After permit is issued, we have 5-7 business days to start work
- 9) Utilities need to be in the ground or staked
- 10) Pole mounted irrigation controllers & fountain controllers sent to us or be on site prior to install
- 11) We can start to schedule Underground inspections 1-3 business days after work has been started depending on length of trench. Typical 60-100A irrigation control services duration time is 1-3 business days from start until final inspection
- 12) Approved final inspection results along with image of blue sticker "Orange County" will be emailed to builder to schedule power release/ Meter set with utility company provider

Every Wednesday we have production meetings to update status log by address on sitemap
